

# WORKSHOP INTERIOR

FOR THE COMMITTED

## EVERYTHING IN ITS PLACE

For a modern workshop to be efficient, safe and profitable, order must be maintained. Everything in its place. The workshop interior from Kamasa Tools is designed with just that goal in mind. Moreover, their modern look produces an impression of professionalism when customers visit your shop.

The workshop interior is based on the same materials and designs as our popular tool trolleys. With the self-supporting design, the interior does not need to be secured to a wall, which naturally provides more freedom in positioning in a workshop environment.

You'll recognize the color scheme from our silver-grey trolleys with their black drawer fronts. For large orders there are possibilities for choosing the colors yourself. Two interior solutions are presented here, but with the modular system, you have considerable freedom in customizing your workplace.

## **“I DON'T COMPROMISE”**

In my profession, I perform advanced procedures with people's health, well-being and future at stake. There is no room for mistakes. This is why I use the very best tools money can buy.

Tinkering with engines is my hobby. A way to relax. But even so, I don't compromise on tools here either. That's why I use Kamasa Tools products.

*Daniel Danielsson, Head of Dentistry*

# WORKSHOP INTERIOR TWO MODULES

Workshop interior with cabinets, one with seven drawers and one with doors and a shelf. Each drawer can handle a load of 45 kg. The perforated panel has square holes for hanging tools. Worktop in stainless steel or oak wood. Top cabinet with gas-sprung door, hinges at top.

Stock no.	Type of worktop	Width	Height	Depth	Max. load per drawer
